

## Lighthunter Products

### IPC2324SS-DZK 4MP Vandal-resistant VF Network Bullet Camera

- 1/3" progressive scan CMOS
- 4MP (2688\*1520) @ 30 fps
- Color: 0.002 Lux @ (F1.35, AGC ON)
- 2.7~ 13.5mm, Motorized
- Audio I/O, Alarm I/O
- Smart Functions
- IP67 & IK10

### IPC3234SS-DZK 4MP Vandal-resistant VF Network Dome Camera

- 1/3" progressive scan CMOS
- 4MP (2688\*1520) @ 30 fps
- Color: 0.002 Lux @ (F1.35, AGC ON)
- 2.7~ 13.5mm, Motorized
- Audio I/O, Alarm I/O
- Smart Functions
- IP67 & IK10

### IPC2A22SA-DZK 2MP Deep Learning VF Network Bullet Camera

- 1/2.8" progressive scan CMOS
- 2MP (1920\*1080) @ 30 fps
- Color: 0.001 Lux @ (F1.35, AGC ON)
- 2.7~ 13.5mm, Motorized
- Audio I/O, Alarm I/O
- Deep learning
- IP67 & IK10

### IPC3632SA-ADZK 2MP Deep Learning VF Network Turret Camera

- 1/2.8" progressive scan CMOS
- 2MP (1920\*1080) @ 30 fps
- Color: 0.001 Lux @ (F1.35, AGC ON)
- 2.7~ 13.5mm, Motorized
- Built-in mic
- Deep learning
- IP67 & IK10

### IPC264SA-DZK 4MP Deep Learning VF Network Bullet Camera

- 1/1.8" progressive scan CMOS
- 4MP (2688\*1520) @ 30 fps
- Color: 0.0005 Lux @ (F1.2, AGC ON)
- 2.8~ 12mm, Motorized
- Audio I/O, Alarm I/O(2/1)
- Deep learning
- IP67 & IK10

### IPC3234SA-DZK 4MP Deep Learning VF Network Dome Camera

- 1/1.8" progressive scan CMOS
- 4MP (2688\*1520) @ 30 fps
- Color: 0.0005 Lux @ (F1.2, AGC ON)
- 2.8~ 12mm, Motorized
- Audio I/O, Alarm I/O
- Deep learning
- IP67 & IK10

### IPC6858SR-X38UP-VC 4K Deep Learning Network PTZ Dome Camera

- 1/1.8" progressive scan CMOS
- 8MP (3840\*2160) @ 30 fps
- Color: 0.003 Lux @ (F1.5, AGC ON)
- 5.7 ~ 216.6mm, 38X Optical Zoom
- Audio I/O, Alarm I/O(2/1)
- Deep learning
- IR range: Up to 250m
- IP66

### IPC7622EL-X5SUG 2MP 55x Laser IR Network Positioning System

- 1/2.8" progressive scan CMOS
- 2MP (1920\*1080) @ 60 fps
- Color: 0.003 Lux @ (F1.8, AGC ON)
- 6.4~352mm, 55X Optical Zoom
- Audio I/O, Alarm I/O(7/2)
- Support automatic wiper function
- Tilt -45°~90°
- VF Laser: Up to 1000m
- IP66

## Application Scenarios

Parking Lot

Campus

Apartment

Airport

light than  
your eyes  
can capture

Better Security, Better World

LIGHTHUNTER

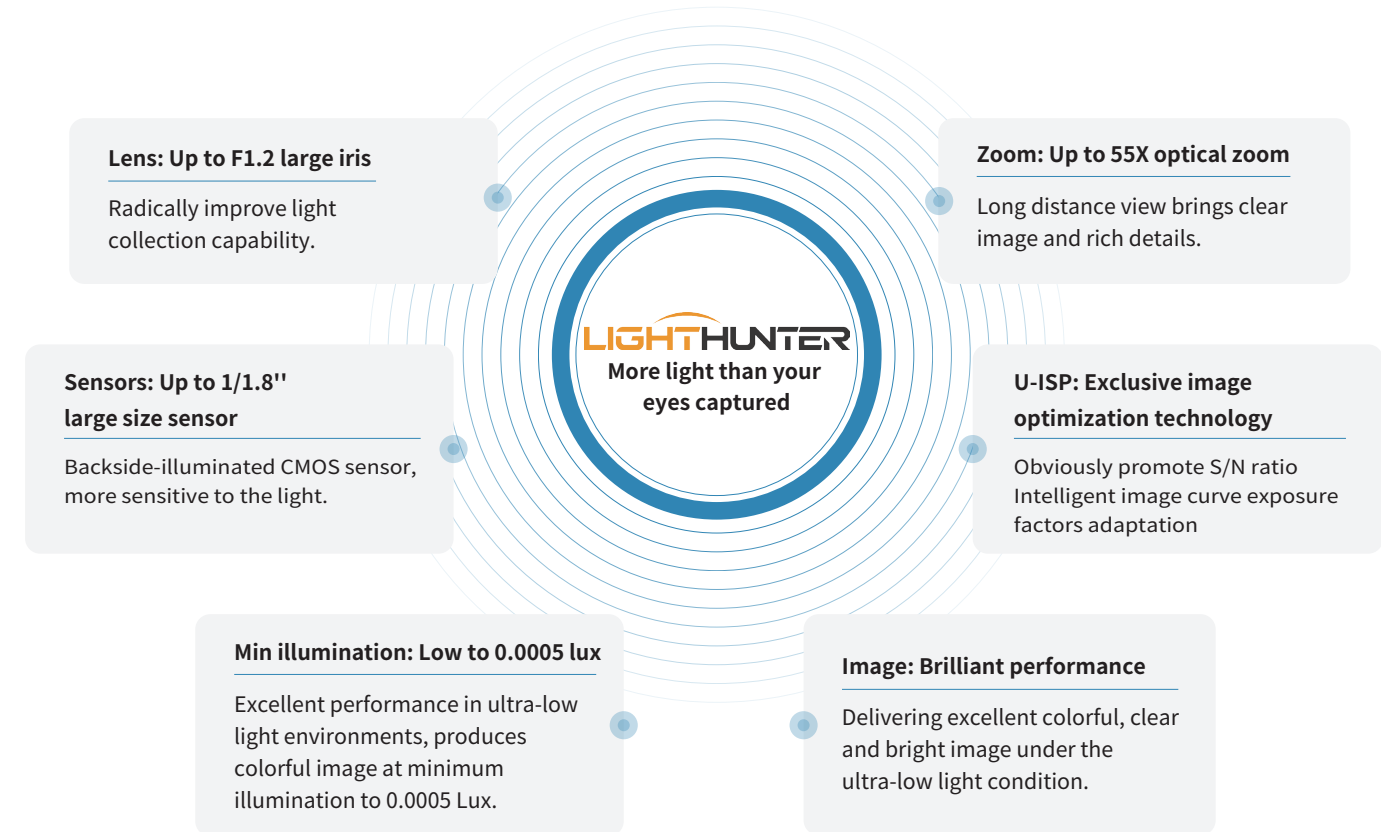

# Background and Development

Most crimes happen at night because the dark environment provides convenient conditions for criminals. Useful information about vehicles and suspects, such as plate number, color, and brand of a vehicle; facial features, hair color, height, and clothing color of a suspect may bring important clues to the police or other people in need. Traditional cameras use IR mode to improve the image solutions in the low light, however, we can't get the color information from the images.

Since a long time ago, Uniview has striven to research a new technology to deliver colorful and clear images in the extremely low light environment. Now, LightHunter technology is available, delivering brilliant brightness and color with extremely clear and clean images.

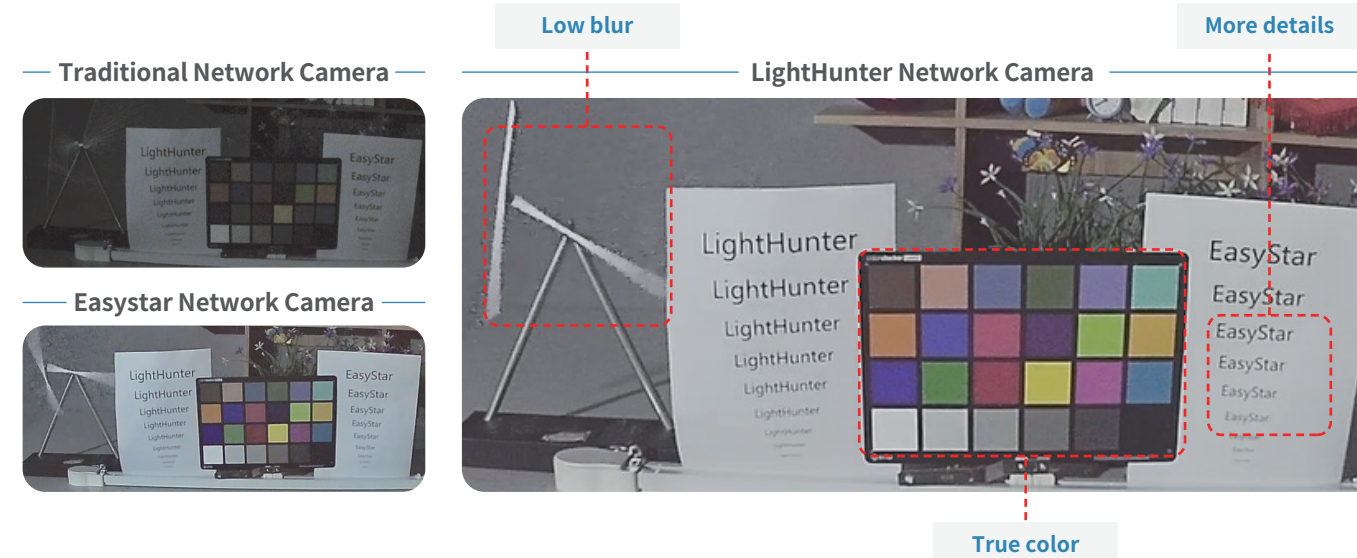

## Technical features

# Image Performance

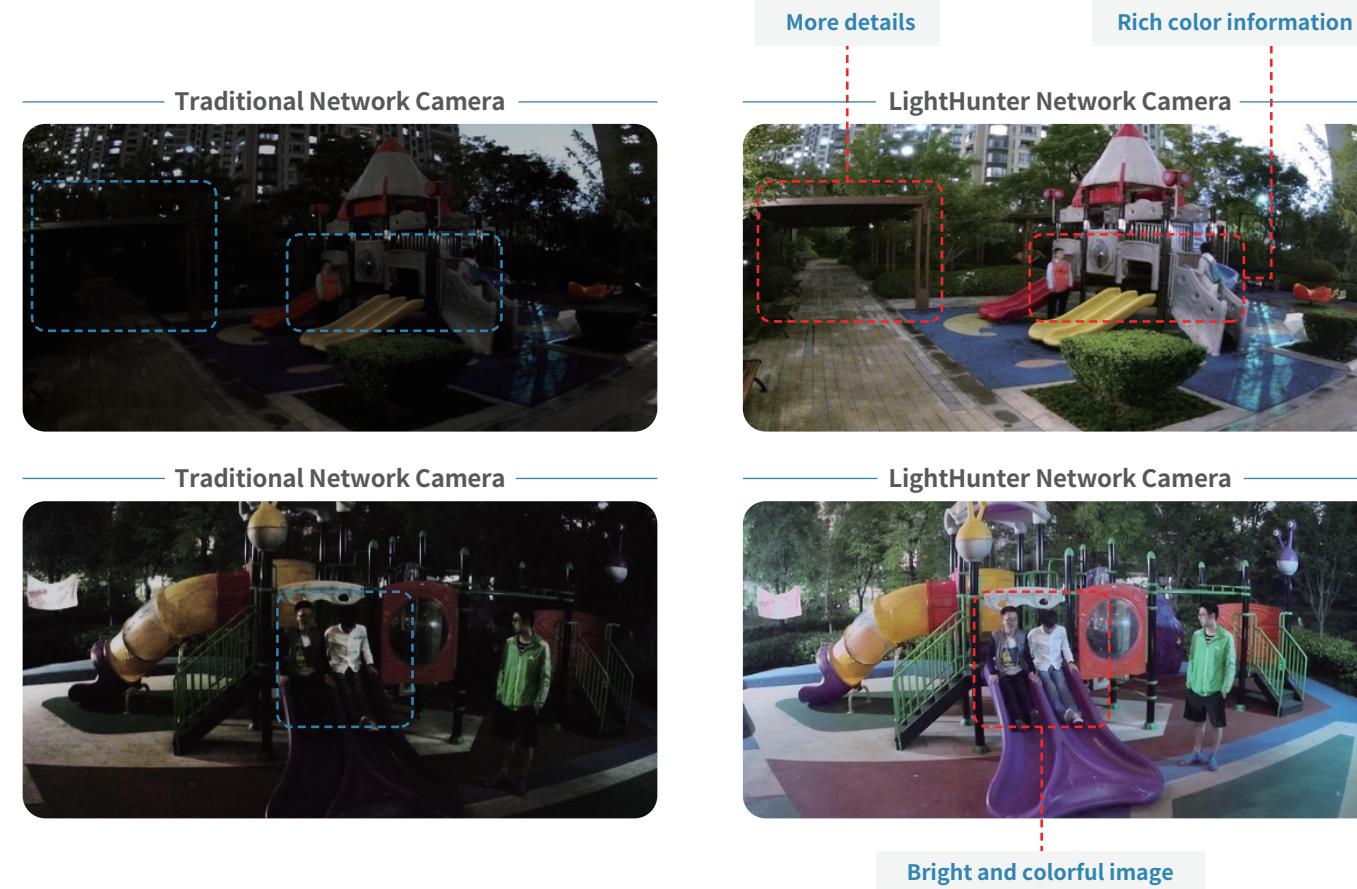

## Indoor image performance

Clear and colorful images with low blur

## Outdoor image performance

LightHunter technology delivers colorful, bright and clear images in the ultra-low light environment

# Deep Learning

## Powered by deep learning, easy target classification

UNV deep learning algorithm did a great number of training through neural network so that the IP cameras are able to realize accurate target classification. Target classification and attributes recognition are the most valuable effects which deep learning technology owns for the security industry.

Depth analysis is performed on the objects detected in the video, classify the human and vehicle target and automatically filter out false alarms caused by animals, rustling leaves, bright lights, rain or snow, etc., greatly improve alarm accuracy rate.

## Powered by deep learning

### Perimeter defender

- Traditional Intrusion detection or crossing line detection is not accurate in some circumstances. For example, it will be mistakenly triggered by animals.
- Based on target classification, UNV perimeter protection function can classify human, vehicle, or other moving objects based on preset settings, reduce false alarm rates.
- Event quick retrieval with NVR. Alarm events are sorted by target type (Human, Vehicle) which highly improves search efficiency.

### Intrusion Detection

### Crossing Line

### Face capture

- Capture high-quality pictures:
  - support three face optimization modes, which can choose the best snapshots to upload to NVR or VMS.
  - Capture capability: up to 40 faces per frame.
- Based on target classification, once detected face, the camera will follow the people and capture snapshot continuously, and at last upload the best face snapshot.
- Edge computing, reduce the back-end devices' cost.

### Face Capture

### Face Capture

### People counting

- Traditional smart functions can't count more than two persons at the same time.
- UNV people counting function is based on target classification, match targets from multi-pose and multi-angle.
- Support two modes: Counting people by region or crossing line
- Much more accurate than traditional people counting.

### Crossing Line

### Region People Counting
