# How to set Object Moving Detection?

Answer:

Detect objects left behind in the specified area and trigger alarms.

Note: This function or management page may vary with models. Please see actual Web interface for details.

1. Click **Setup > Intelligent > Smart Settings**. Choose **Object Moving** and then click ⚙.

2. Select **Enable Object Moving Detection**.

3. In the Detection Rule area, click to add a detection area. To delete, click .

4. Drag the box to set the position and effective range.

5. Set time threshold and sensitivity to decide whether to report an intrusion detection alarm.

- Time threshold: Minimum duration an object is detected in the specified area to trigger an alarm.

- Sensitivity: The greater the number, the higher the sensitivity. An alarm is reported if an object is detected in the specified area for the specified length of time.

6. Set the alarm-triggered actions and arming schedule as required. For the detailed steps and alarm-triggered actions descriptions, refer to *How to set Motion Detection Alarm*.

7. Click **Save**.
